

## INTRODUCTION

What better way to hear Christmas music than on the harp! Here is a collection of carols and festive music suitable for harpists of all abilities.

Having organised concerts of Christmas music for harpists for many years, these arrangements are well tried and tested: in fact, I am told by my students that the whole book is a 'must' for all harpists who play regularly in functions.

Like the first three volumes in the series, fingering and pedalling marks are provided for easy reading. In the contents page an \* denotes whether the arrangement is suitable for the non-pedal harp; phrasing has been left to the performer's discretion.

Let the angelic sounds of the harp help capture the magic of Christmas!
